

Massachusetts Municipal Light Plant Solar Program

Program Details

The new Massachusetts Municipal Light Plant Solar Program allows residential customers of municipal light plants, such as the Paxton Municipal Light Department, to apply for a rebate for the purchase, installation, and usage of PV solar panels on their homes.

The program includes a solar rebate of \$1.20/watt, capped at \$3,000 per system. Eligible solar installations must be 10 kW or less, with less than 20% shading, and facing between 90 and 270 degrees. Systems cannot exceed 80% of customer's average load. Other restrictions may apply.

How to Apply

Interested customers must obtain pre-approval from PMLD, then submit an application with the Massachusetts Municipal Wholesale Electric Company (MMWEC), PMLD's joint action agency. The form can be found online at www.mmwec.org. Customers may call 413-308-1400 to check application status.

Application deadline is March 30, 2020; rebate subject to availability.

Step One

Obtain pre-approval from PMLD and submit application to MMWEC. Upon successful review, MMWEC will forward it to the Massachusetts Department of Energy Resources (DOER).

Step Two

After the DOER evaluates the application, customers will be notified of their rebate status.

Step Three

Upon approval, customers have one year to schedule and complete installation of their solar panels. The rebate will be paid to the customer by MMWEC.
